DETAILED ACTION

Amendment

The preliminary amendment file 18 May 2006 has been entered into this application.

Response to Arguments

Applicant's arguments/remarks, see pages 4-12, filed 18 May 2006, with respect to the rejection(s) of claim(s) 1-6 under 35 U.S.C. 102(b) and 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Examiner's Reasons for Allowance

Claims 1-6 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the examiner agrees with the applicant arguments that the prior art of record, taken alone or in combination, fails to disclose or render obvious a receiving member is provided outside said table and is positioned on the generally same plane as said loading plane and the periphery of the receiving member has a plane configuration so as to come to a position further outside the periphery of the work, in combination with the rest of the limitations of the claim. Claim 2-4 and 6 are allowable by virtue of their dependency.

As to claim 5, the prior art of record, taken alone or in combination, fails to disclose or render obvious said table is formed out of material having translucency, and is formed into a size so that the periphery edge thereof comes to position further outside the periphery of said work, in combination with the rest of the limitations of the claim.

Additional Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed in the attached form PTO-892 teach of other prior art alignment apparatus for aligning the central position and an orientation mark of a generally plate-like work with a predetermined position.
